

Equipment & Services

- 250Te modular system
- Fully compatible with NXGEN load spreading and jacking systems
- Supporting engineering & design services
- SPMT and bridge support steelwork
- Temporary grillage and bracing support

Specifications & Capabilities

- Dimensions LxWxH = 1.6m x 2.0m x 0.5m
- Capacity
 - 250Te vertical load per tower
 - Free standing up to 5m height with 10% side load
 - Greater heights can be accommodated with bracing elements
- Handling
 - Up to 7 frames can be lifted in a stack
 - Fork pockets provided in both directions
 - Stackable for transportation purposes
